Read Environment I have a Java 7 31 file, named NW2 I have the key file from the service market place, NW2_multiple.. com~tc~bl~offline_launcher~impl jar License File Installation to SAP Netweaver 7.. Error while executing PhaseTypeExecuteTask with input file ExecuteTasks.xml and task INSTALL_LICENSE.. Could not get the hardware key Java net ConnectException: Connection refused at com.. I tried supplying each of these with complete path, but I get the error 'saplikey: failed to read table SVERS after connecting to the database' every time..) I found that on the command line it should work with saplikey on: saplikey pf= -install I can't figure out what they mean.. More information can be found in the log file /usr/sap/CA1/upg/java/log/INSTALL_LICENSE_ILI_0X.. LOG----- The execution of UPGRADE/INSTALL_SHADOW_ENGINE/INSTALL_LICENSE ended in error. ae05505a44 [Microsoft Office Home For Mac](#)
