About This Game

One day, all at once, magic entered the world as we know it.

It's existence was not something known in secret circles - the current government announced it publicly, leading it to quickly become common knowledge. Now, we're in an age where magic is used as a normal resource and has permeated throughout many different industries and fields around the world.

This is a story about the fates of those who live in this magical world. Read on as six radically different people find their paths converging in this new world...

TITLE

END GAME

This VN has to be one of the coolest I read in a long time since the days of FateVNight and Tsukihime. The plot is interesting and engrossing, the characters interesting and defy your expectations. I personally believe it would be a great pickup for anyone who enjoy VNs.

With that being said, special disclaimers below.

- 1) This game have no branching choices\change of plot if you resolve an event earlier. Basically just sit back and enjoy the ride. [Unlike FateVNight and their infamous BAD endings, there is exactly one route]
- 2) The beginning came off a little slow, with the main characters appearing to be standard anime tropes. One of the MCs was so stereotypical it made my teeth cringe. But I want to say by end of the first story arc the pay off is definitely worth it.
- 3) The only real downside is this game recycle a lot of combat animation and graphics.
- 4) Also, some of the character graphics were a bit eh. I am not an SJW by any stretch of imagination and I enjoy pretty waifus like any other man, but I can't imagine a certain female heroine walk around the street in the winter with only a bra on made sense...

With that being said, I give this game an 8/10 and definitely an good experience.
